

ELPRO Modem Setup for Ziton ZP1/2 Fire Panels

Serial Settings for 245U-E:

8-N-1 (8 data bits, NO parity, 1 stop bit)

- Serial data rate set to 38400 bps
- Access Point / Client Configuration
- Distance of 10km possible with 100% Line of Sight

Note: Ensure correct wiring to A+B terminals of RS485 port to Ziton Panel

NB: The Ziton ZP1/2 Fire Panel Network works on a peer-to-peer token passing network topology. Therefore, every radio in the network needs to have a reliable radio path to every other radio
